2. Pendahuluan

2.1. Ringkasan Proyek

Semakin besarnya perusahaan, semakin besar pula produksi yang dilakukan. Melihat target produksi hingga tahun 2025 yang terus meningkat, perusahaan dirasa perlu untuk melakukan strategi khusus dalam upaya mengejar mencapai target yang diharapkan. Saat ini kegiatan operasional pertambangan dari hulu ke hilir dari mulai laporan, simulasi sampai analisa masih dikerjakan secara manual dan tiap proses tidak terintegrasi satu sama lain, sementara jumlah staf yang mendukung operasional terbatas dan target produksi semakin tinggi. Oleh karena itu penting untuk dilakukan peningkatan dari sisi teknologi dalam upaya mempercepat setiap proses operasional agar dapat mengimbangi kebutuhan produksi. Ditambah lagi hal ini sejalan dengan program Road to Mining industry 4.0 yang dicanangkan oleh Kementerian ESDM melalui Ditjen Minerba, maka tema Transformasi Digital menjadi pilihan yang tepat untuk segera diwujudkan oleh perusahaan.

2.2. Maksud & Tujuan Proyek

2.3. Ruang Lingkup Proyek

Dalam upaya tersebut, kehadiran Coal Chain Management (CCM) yang merupakan bagian dari U-GEMS dibutuhkan untuk memastikan terintegrasinya data dari semua proses operasional yang dilalui dari hulu ke hilir, serta mampu membuat proses operasional menjadi lebih efektif dan efisien. Untuk pengembangan tahap awal, sistem ini dilengkapi dengan 2 modul utama yakni:

2.4. Tujuan Dokumen

Dokumen ini berisikan langkah - langkah sebagai panduan (User Manual) bagi Pengguna Aplikasi Coal Chain Management, khususnya Port Traffic Management. Tujuan pembuatan dokumen ini sebagai dokumentasi dan petunjuk tata cara Pengguna dalam menggunakan aplikasi untuk setiap role yang berbeda sehingga dapat menjalankan aktivitas operasional dengan prosedur yang jelas dan terdokumentasi.
